A diagram illustrating the placement of the fatha diacritic. It features a series of black dots arranged in a grid-like pattern on a yellow background. A horizontal dashed line passes through the middle of the dots. Above this line, there are four dots in a row, with a single dot positioned above the first dot. Below the line, there are five dots in a row, with two dots positioned below the fourth dot. A short, thick black stroke extends from the top dot towards the right, representing the direction of the vowel sound.A diagram showing a keyboard layout for inputting the fatha diacritic. The layout consists of three colored boxes: a light green box at the top containing the letter 'a', a pink box at the bottom left containing 'fathā', and another pink box at the bottom right containing 'Shift + q'. The boxes are arranged horizontally, representing the keys on a keyboard.

A large black Arabic letter 'Q' is positioned at the top center of a yellow rectangular frame. Below it, a series of black dots of varying sizes are arranged in a pattern: two dots on the left, three on the right, one dot above the first two, two dots below the first two, and two dots below the third one.

A large black Latin letter 'U' is centered in a light green rectangular frame.

A black Latin letter 'd' with a dot below it is centered in a pink rectangular frame.

The text 'Shift + e' is centered in a pink rectangular frame.

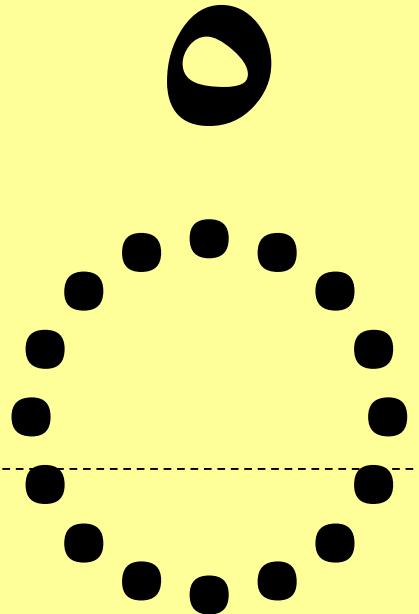

The image shows the Arabic diacritic 'tanwīn' (damma), which consists of a series of black dots arranged in a specific pattern. There are two rows of dots: one row with three dots above a row with four dots. These dots are positioned above the letters 'un' on the right. The entire arrangement is contained within a yellow rectangular frame with a dotted border.
